

More Stability, *Intelligent Reflective* *Photoelectric Sensor* Less Trouble

One-touch

**Can your sensor
detect these targets?**

Unstable Detection Is Unavoidable with Conventional Photoelectric Sensors

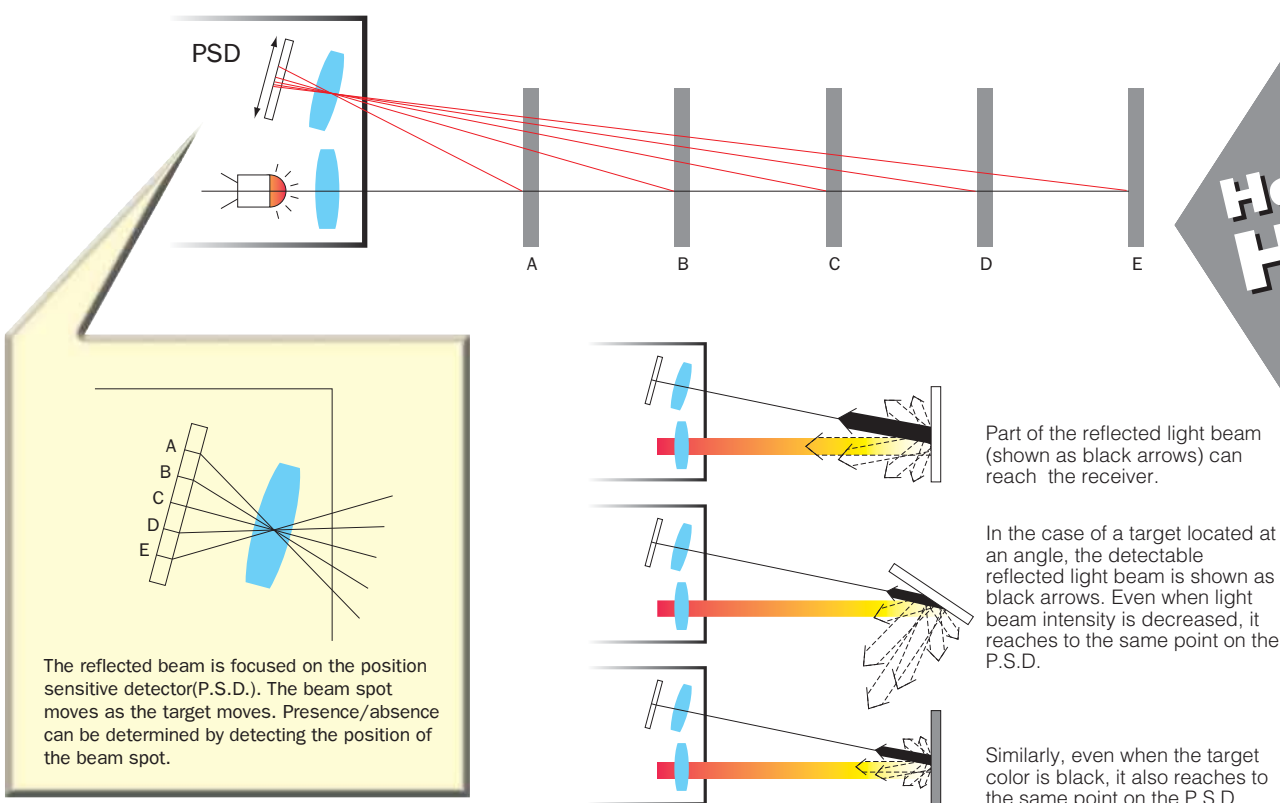

Two New Technologies Enable PZ-V/M to Detect More Reliably

Using P.S.D. & A.P.R. circuit, the PZ-V/M Series is unaffected by a target's color, angle, background, or dirt.

The PZ-V/M Series sets a new standard as the most dependable sensor in harsh environments.

P.S.D. (Position Sensitive Detector)

A.P.R. circuit (Automatic Power Reinforcement)

Stable detection is possible due to the A.P.R. circuit which automatically adjusts the amount of light emitted according to the color and angle of the target.

Only the PZ-V/M Series Provides Reliable Detection Without Re-adjusting the Setting

Unaffected by Angle, Color, or Dirt

Introducing Multi-reflective Photoelectric Sensors

Provide Solutions to All the Problems Experienced with Conventional Reflective Types.

Stable Detection Unaffected by Variations in Color

With conventional reflective type sensors, the detecting distance varies greatly for some dark-colored targets, such as black rubber. However, the PZ-M/V multi-functional reflective type offers almost the same detecting distance for all targets.

Excellent Angle Characteristics

With conventional reflective type sensors, the detecting distance varies greatly when a target is tilted or has a slanted surface. However, the PZ-M/V multi-functional reflective type offers almost the same detecting distance regardless of target orientation.

Excellent Resistance to Dust and Dirt

With conventional reflective type sensors, the detecting distance varies greatly when the sensor head surface becomes dirty due to harsh environments. However, the PZ-M/V multi-functional reflective type sensor offers almost the same detecting distance even when the surface of the sensor head is dirty.

One-touch, Fully-Automatic Calibration

Allows Anyone to Adjust the Sensor.

Easy calibration to start operation.

Fully-Automatic Calibration (To calibrate on a moving target)
Calibration does not cause a production delay.

Two-Point Calibration (To calibrate on a stationary target)
Two point calibration is used to make minute sensitivity adjustments that cannot be done with conventional automatic calibration.

Maximum Sensitivity Setting

The sensitivity is set to the optimum value so that everything other than the background is detected.

Digital display allows a visual check of settings

If a problem occurs, the status of the sensor can easily be checked by noting the display value.

Fine sensitivity adjustment is simple.

Available in 36 Models

including thrubeam and retro-reflective types.

Visible red beam*

Enables quick and easy alignment of optical axis or positioning of beam spot on the target.

Not available on PZ-V7 or PZ-M7* models.

M3 S.Steel internal thread

To ensure that the device is securely mounted, an M3 thread is integrally moulded within the PZ-V/M in order to double the mounting strength.

Sensor Variations

Intelligent Reflective (fully-automatic push button) type: 18 models

Detecting distance	Output	Model	Cable/Connector
100mm	NPN	PZ-V11	2m Cable
		PZ-V12	M8 connector
	PNP	PZ-V11P	2m Cable
		PZ-V12P	M8 connector
300mm	NPN	PZ-V31	2m Cable
		PZ-V32	M8 connector
	PNP	PZ-V31P	2m Cable
		PZ-V32P	M8 connector
900mm	NPN	PZ-V71	2m Cable
		PZ-V72	M8 connector
	PNP	PZ-V71P	2m Cable
		PZ-V72P	M8 connector

Wide model variation

- NPN/PNP type
- Five types of optional brackets
- Optional slit plate/polarizing filter is available
- M8/M12 connector models available

	Cable Length	Model Name
M8 connector cable	2m	OP-42187
	10m	OP-42188
M12 connector cable	2m	OP-94734
	5m	OP-97491

High-power custom E-max LED

Unbeatable detecting distance of 10m. All models feature a high-power red LED as the light source to achieve radically high power so unaffected by dust.

Waterproof

All models of the PZ-M/V, including the reflector of the retro-reflective type conform to IP67. The sensors can be used in harsh environments where they are subjected to water or other liquids.

High-intensity indicator

The indicator features a large-size smoke lens and high-intensity LED to dramatically improve visibility. The improved visibility allows you to monitor the sensor operation from a remote position.

All Models Designed for Toughness

and for ease of use.

Light source	Red LED					Infrared LED	Red LED		Infrared LED
Sensitivity adjustment	1-turn trimmer (230°)						Automatic push button		
Response time	1.5 ms max.	1 ms max. (1.2 ms max. with alternate-frequency type, 2 ms max. with M61 only. ¹)							
Operation mode	LIGHT-ON/DARK-ON (switch-selectable)								
Indicators ³	Output and power: Orange LED, Stable operation: Green LED								
Digital monitor	—						7-segment, 3-digit red LED		
Control output	NPN: 100 mA (24 V) max./PNP: 100 mA (24 V) max., Residual voltage: 1 V max.								
Protection circuit	Reversed polarity, overcurrent protection, surge absorber								
Power supply	12 to 24 VDC ±10%, Ripple (P-P): 10% max., Class 2								
Current consumption	T: 24 mA max. R: 27 mA max.	34 mA max.		30 mA max.		38 mA max.	37 mA max.		45 mA max.
Enclosure rating	IP67								
Ambient light	Incandescent lamp 5000 lux max. ⁴ , Sunlight: 20000 lux max.								
Ambient temperature	-20 to +55°C (-4 to +130°F), No condensation								
Relative humidity	35 to 85%, No condensation								
Housing	Glass-fiber reinforced plastic								
Weight (including 2-m 6.6' cable)	T: Approx. 50 g R: Approx. 50 g	Approx. 55 g				Approx. 70 g	Approx. 55 g		Approx. 70 g

1. The alternate-frequency type is indicated by replacing "1" at the end of model name with "5". The models are **PZ-M65, M15, M35, M75, V15, V35 and V75**.

2. The detecting distance is obtained with the maximum sensitivity.

3. The transmitter of the **PZ-M51** features a power indicator only.

4. 3000 lux max. for **PZ-M71P/V71P**.

Slit A-4 (Optional)

An optional slit plate and/or polarizing filter is available for the thrubeam type sensors (PZ-M51). Model No.: A-4 (Set of 3 types of slit plates and a polarizing filter)

	Slit plate		
Slit width (mm)	0.5	1	2
Detecting distance (mm)	500	1000	2000
Target size (mm)	0.5 X 5	1 X 5	2 X 5

	Slit plate and polarizing filter			
Slit width (mm)	—	0.5	1	2
Detecting distance (mm)	4000	200	600	1300
Target size (mm)	6 X 6	0.5 X 5	1 X 5	2 X 5
